

The product development system for teams and agents

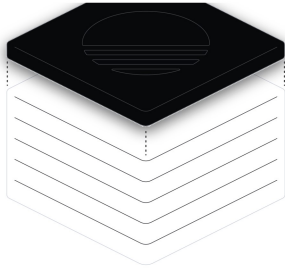

Purpose-built for planning and building products.

Designed for the AI era.

Issue tracking is dead linear.app/next →

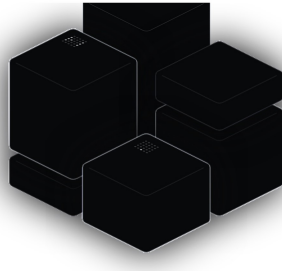

A new species of product tool. Purpose-built for modern teams with AI workflows at its core, Linear sets a new standard for planning and building products.

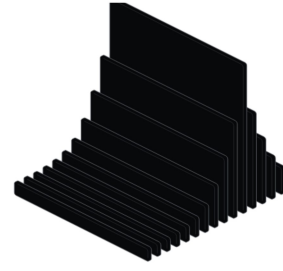

Built for purpose

Linear is shaped by the practices and principles of world-class product teams.

Powered by AI agents

Designed for workflows shared by humans and agents. From drafting PRDs to pushing PRs.

Designed for speed

Reduces noise and restores momentum to help teams ship with high velocity and focus.

Make product operations self-driving

Turn conversations and customer feedback into actionable issues that are routed, labeled, and prioritized for the right team.

- lena** 10:47 PM
Anyone else noticing the iOS app feels slow to open if you haven't used it in a bit?
- didier** 10:47 PM
Yea, we're still blocking initial render on a full vehicle_state sync every time...
- andreas** 10:47 PM
Feels like we could render sooner and load the rest in the background. Probably also worth tracking startup timing so we know how often this happens!

@Linear create urgent issues and assign to me

Define the product direction

Plan and navigate from idea to launch. Align your team with product initiatives, strategic roadmaps, and clear, up-to-date PRDs.

2.0 Plan →

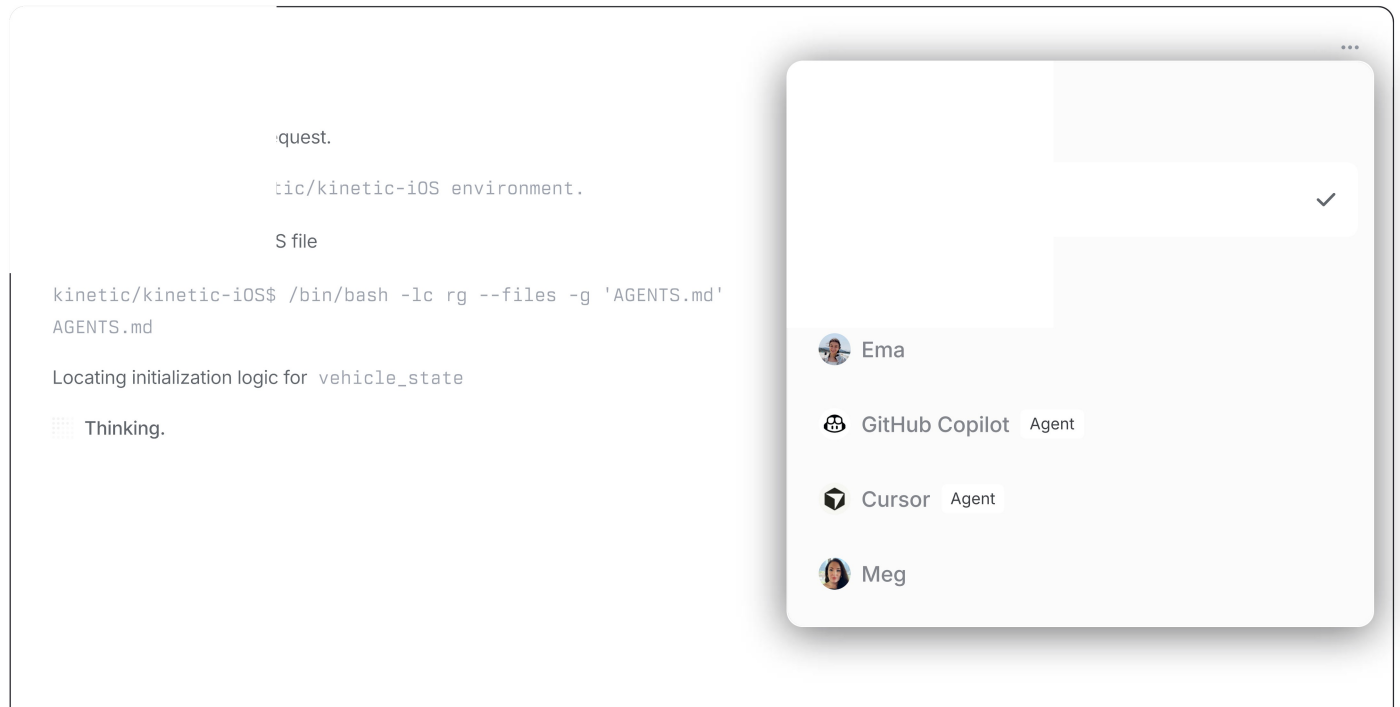

- 2.1 Projects
- 2.3 Initiatives

- 2.2 Documents
- 2.4 Visual planning

MOVE WORK FORWARD across teams and agents

Build and deploy AI agents that work alongside your team. Work on complex tasks together or delegate entire issues end-to-end.

3.0 Build →

3.1 Issues

3.3 Linear MCP

3.5 Cycles

3.2 Agents

3.4 Git automations

Review PRs and agent output

Understand code changes at a glance with structural diffs for human and agent output. Review, discuss, and merge — all within Linear.

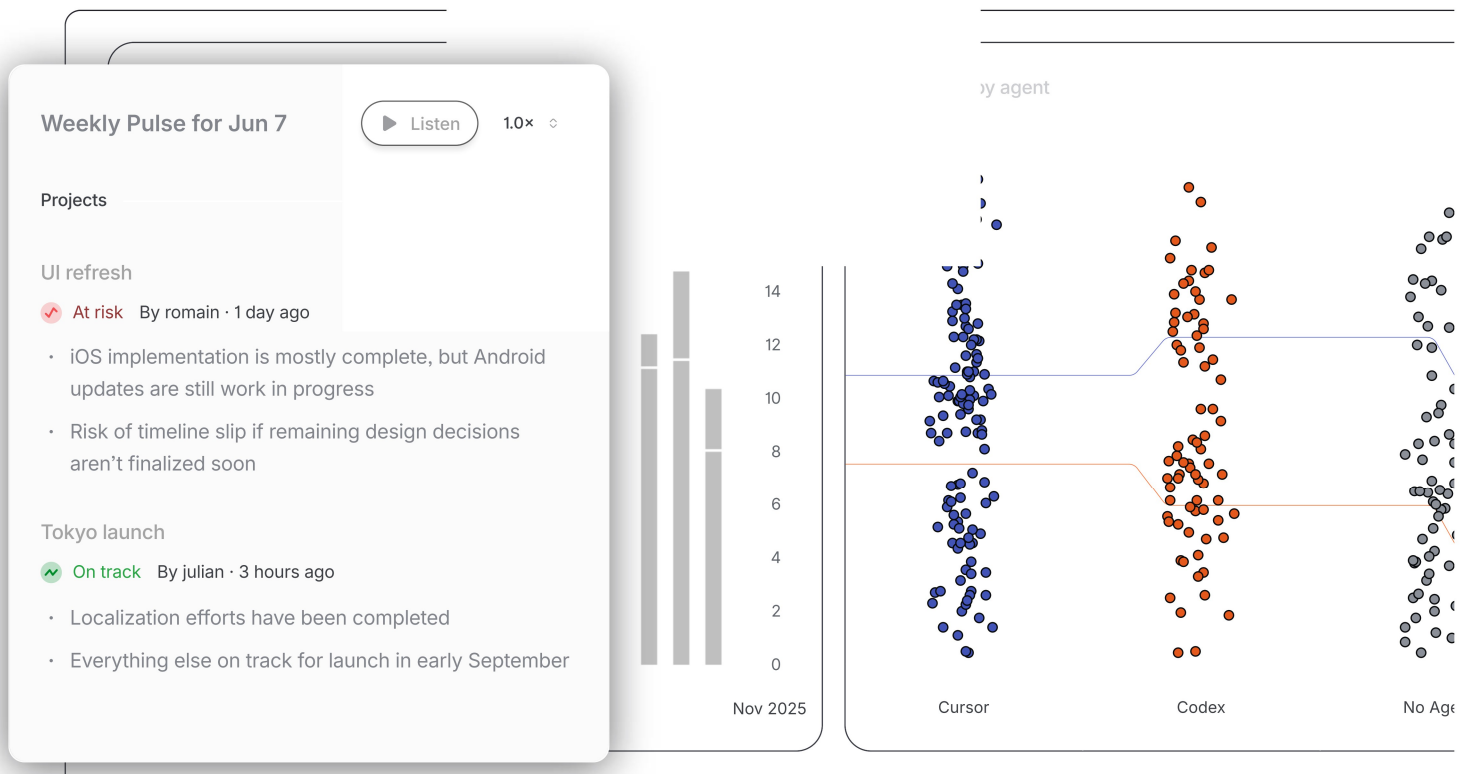

4.0 Diffs →

```
01 export const CodeReview = () => {
02   <Diff.Provider>
-     <Slow />
-     <Fragmented />
-     <HumanOnly />
+     <Frictionless />
+     <Integrated />
+     <AgentReady />
06   </Diff.Provider>
07 };
```

Understand progress at scale

Take the guesswork out of product development with project updates, analytics, and dashboards that surface what needs your attention.

5.0 Monitor →

Changelog

Team documents

Important team context doesn't always belong in a specific issue, project, or initiative. Teams also need a dedicated place for the notes...

JUN 3, 2026

Linear Diffs

Agents generate large volumes of code, but individuals are still accountable for the changes that merge. This leads to a lot of review...

“You just have to use it and you will see, you will just feel it.”

“Our speed is intense and Linear helps us be action biased.”

“Linear is excellent, just excellent. It has the right opinions for fast moving teams.”
