

Announcing Resend Forward >

The best way to reach humans instead of spam folders. Deliver transactional and marketing emails at scale.

[Documentation](#)

Companies of all sizes trust Resend to deliver their most important emails.

A simple, elegant interface so you can start sending emails in minutes. It fits right into your code with SDKs for your favorite programming languages.

Node.js Next.js Remix Nuxt Express Hono Redwood Bun Astro

```
1 import { Resend } from 'resend';
2
3 const resend = new Resend('re_XXXXXXXX');
4
5 (async function() {
6   const { data, error } = await resend.emails.send({
7     from: 'onboarding@resend.dev',
8     to: 'delivered@resend.dev',
9     subject: 'Hello World',
10    html: '<strong>it works!</strong>'
11  });
12
13  if (error) {
14    return console.log(error);
15  }
16
17  console.log(data);
18 })();
```

We are a team of engineers who love building tools for other engineers.
Our goal is to create the email platform we've always wished we had — one that *just works*.

Test mode

Simulate events and experiment with our API without the risk of accidentally sending real emails to real people.

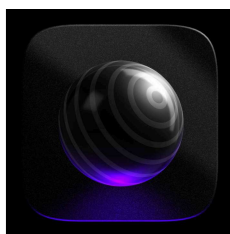

[Learn more](#)

Modular webhooks

Receive real-time notifications directly to your server. Every time an email is delivered, opened, bounces, or a link is clicked.

[Learn more](#)

A modern editor that makes it easy for anyone to write, format, and send emails.
Visually build your email and change the design by adding custom styles.

Send with Next.js

All the features you need to manage your email sending, troubleshoot with
detailed logs, and protect your domain reputation – without the friction.

Intuitive analytics

Full visibility

Domain authentication

Resend is driving remarkable developer experiences that enable success stories, empower businesses, and fuel growth across industries and individuals.

"I've used Mailgun, Sendgrid, and Mandrill and they don't come close to providing the quality of developer experience you get with Resend."

Brandon Strittmatter
Co-founder of Outerbase

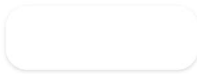

"Resend is an amazing product. It was so easy to switch over. I feel confident knowing that our important emails are in good hands with Resend. Everyone should be using this."

Shariar Kabir
Founder at Ruby Card

"All of our customers are located in South America, so having a solution that could send emails from the region closest to our users is very important. Resend's multi-region feature is a game-changer for us."

Giovanni Keppelen
CTO & Partner at VOA
